

# INTERNATIONAL AMATEUR RADIO UNION

## REGION 3

# BANDPLAN

Revised: 16 October 2009

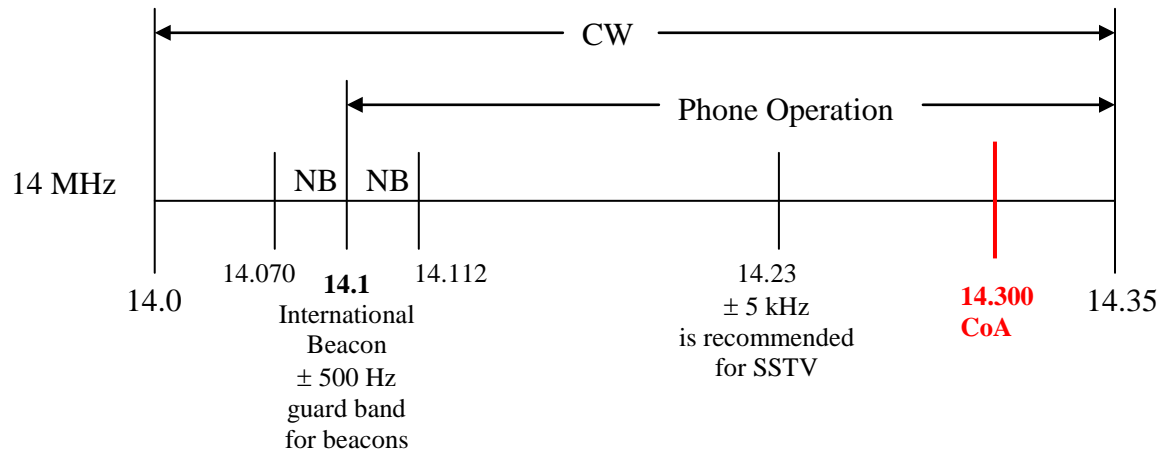

Note :

- ✓ Where the total band available nationally is 100 kHz or less, phone operation may commence at 3.525 MHz.
- ✓ Emergency CoA frequency 3.600 MHz ( All Modes  $\pm$  5 KHz )

-2-  
IARU Region 3 Bandplan

Note : Emergency CoA frequency 7.110 MHz ( All Modes  $\pm 5$  KHz )

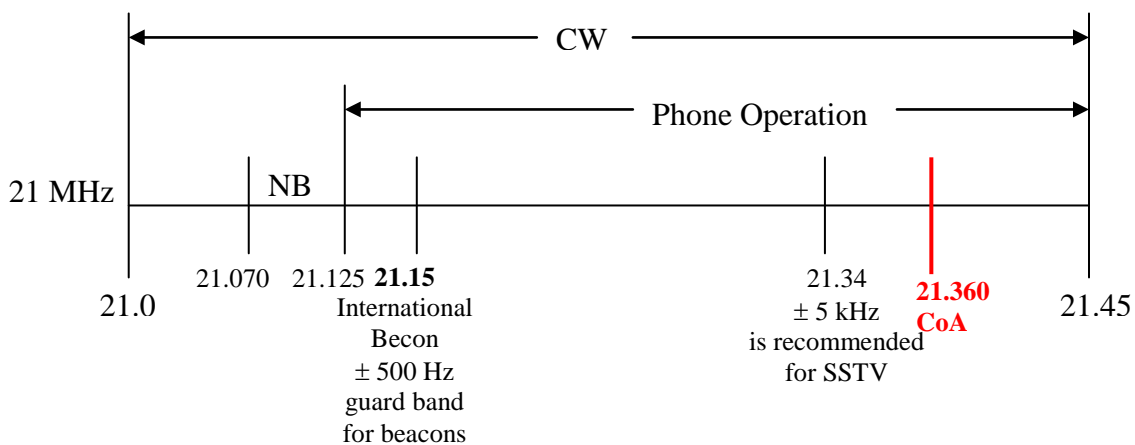

Note:

- ✓ Considering the dramatic increase in data mode usage on the 20 meter band, it is recommended that the sub-band for these classes of signals be 14.070 MHz to 14.112 MHz (with  $\pm 500$  Hz at 14.100 MHz for beacons), and within that data sub-band the current practices of traditional data modes may continue up to 14.095 MHz with 14.095 to 14.112 MHz being reserved for other data modes including Packet.
- ✓ Emergency CoA frequency 14.300 MHz ( All Modes  $\pm 5$  KHz )

-3-  
IARU Region 3 Bandplan

Note : Emergency CoA frequency 18.160 MHz ( All Modes ± 5 KHz )

Note : Emergency CoA frequency 21.360 MHz ( All Modes ± 5 KHz )

IARU Region 3 Bandplan

-5-  
IARU Region 3 Bandplan

Bands above 1300 MHz:

Societies should consult with the amateur satellite community for proposed satellite operating frequencies before deciding local bandplans above 1300 MHz.

The Basic Principles Underlying the IARU Region 3 Bandplan:

- (1) In all cases of conflict between a bandplan and the national regulations of a country, the latter shall prevail.
- (2) Nothing in these bandplans shall be construed as prohibiting different national arrangements, provided that harmful interference is not caused to stations in countries operating in accordance with the regional bandplan.
- (3) Notwithstanding item 2 above, Member Societies of IARU Region 3 are strongly urged to use these regional bandplans as a basis for their national bandplans.

[Legends]

- CoA: Emergency Centre of Activity frequency  
EME: Earth-Moon-Earth, Meteor Scatter, Auroral Scatter and other weak-signal  
NB: Narrow band modes including CW, RTTY, Packet and modes with similar bandwidth not exceeding 2 kHz.  
Phone: Phone operation includes SSTV, FAX and modes with similar bandwidth not exceeding 2 kHz.  
Satellite: This segment should be kept clear of other operating modes.  
Secondary: At 7.2 to 7.3 MHz, amateur stations shall not cause harmful interference to stations of the Broadcasting Service.  
WB: Wide band modes including FM.

Adopted at the IARU R3 14<sup>th</sup> conference, Christchurch New Zealand 2009
