Summary Record
International Amateur Radio Union
Administrative Council Meeting
September 24, 2026

1. The 64th meeting of the IARU Administrative Council (AC) was held on Thursday, September 24, 2026 in Vienna, Austria. Members participating in the meeting were IARU President Tim Ellam, VE6SH/G4HUA, in the Chair; Vice President Thomas Wrede, DF2OO; Secretary Joel Harrison, W5ZN; Sylvain Azarian, F4GKR President, and Mats Espling, SM6EAN Secretary, IARU Region 1; Jose Arturo Molina, YS1MS President, and Rod Stafford, W6ROD Secretary, IARU Region 2; Wisnu Widjaja, YB0AZ President, and Ken Yamamoto, JA1CJP Secretary IARU Region 3.

   Also participating at the invitation of the AC was IARU Region1 President-Elect Hans Blondeel Timmerman, PB2T. President Ellam called the meeting to order at 0900 Vienna local time.

2. A moment of silence was observed for radio amateurs who have died since the October, 2025 meeting, especially Ted Alleyne 5Z4NU, Colin Thomas G3PSM, Abdullah bin Hamad Al Attiyah A71AU, Peter Chadwick G3RZP, Dr. Robert Whelan, G3PJT, Bob Jones VE7RWJ, Kan Mizoguchi JA1BK, and Jay Holladay, W6EJJ.

3. The following agenda was approved:

    1. Opening of Meeting by President
    2. Introductions, meeting arrangements, remembrances
        a. Roll Call of Participants
        b. Meeting Arrangements
        c. Moment of Silence
    3. Approval of Agenda
    4. Report of officers
        a. Report of President Ellam
        b. Report of Vice President Wrede
        c. Report of Secretary Harrison
    5. Reports from the regional organizations
        a. Region 1 - Sylvain Azarian, F4GKR
        b. Region 2 – Jose Arturo Molina, YS1MS
        c. Region 3 – Wisnu Widjaja, YB0AZ
    6. Review of written reports of International Coordinators and Advisors
        a. IARU Beacon Project Coordinator – Peter Jennings, AB6WM/VE3SUN
        b. Satellite Advisor – Hans Blondeel Timmerman, PB2T
        c. IARU EMC Coordinator – Martin Sach, G8KDF
        d. IARU Intruder Watch/Monitoring Service – Gaspar Milo, EA6AMM
    7. ITU and related issues
        a. ITU Radiocommunication Sector (ITU-R)

1. WRC-27
2. Plenipot-26

b. ITU Development Sector (ITU-D), Ole Garpestad, LA2RR
c. Regional reports on RTO

8. Strategic Planning
   a. IARU Restructuring Status
      1. Policy 5 Proposed Revision for election of President & Vice President
9. Operational and administrative matters
   a. Relations with Member Societies
      1. Applications for IARU Membership (if any)
      2. Termination of MS status for Bangladesh Amateur Radio League
      3. Member -Society and Second Society Issues
   b. 2027 IS Budget
   c. Amateur Radio Administration Course
   d. Technical Representatives
   e. Michael Owen Award and IARU Diamond Award
10. HamRadio.org website update
11. World Amateur Radio Day 2027 Theme
12. Any other business
    a. IARU Travel Policy Review (IS)
13. Discussion of venues and dates for next AC meeting

4. Reports of the officers

4.1. Mr. Ellam presented oral remarks on his written report, highlighting his representative travel on behalf of IARU and ITU relations. He noted we continue to be regarded as a valued participant in the work of the ITU, and our contributions are appreciated. He stressed that IARU must keep engaging the ITU on our policies generally and on matters affecting the Amateur Services in particular. Like any organization, the ITU faces succession challenges. We should therefore look ahead to future leaders and others in key positions, recognizing that many of those who have supported us so effectively in the past will eventually move on.

Succession planning is important to IARU as well, emphasizing that we need to continue to suggest names of individuals who can enhance our work. When those people are identified we should make sure they are engaged and not simply left on a list. Succession planning is always an issue so when we identify good people, they should have a role going forward both for training and to allow us to identify other tasks that they might fill.

In closing, this will be the final in-person AC meeting for our colleagues Sylvain and Mats as they complete their terms in Region 1. Although we will have opportunities to recognize them during the meeting, I want to add my own thanks. It has been a pleasure to work with both, and I deeply appreciate their hard work and contributions

to the AC. They have been exemplary Council members, consistently representing the interests of their region. Their support during the restructuring process was especially valuable. We will miss their contributions and collegiality, and although they are now retiring from the AC, I hope they will remain involved with IARU.

4.2. Mr. Wrede presented his written report as Vice President, highlighting his role and responsibility as coordinator for our ITU effort. He provided a Power Point update and comments on ITU Working Party 1A, 4A, 5A, 7B, and 7C. He noted excellent progress on our ITU-R contributions in WP 5A including the Amateur and Amateur-Satellite Service Handbook, experimental activities in the millimetric wave bands by amateur stations, disaster communications in the amateur and amateur-satellite services, frequency sharing criteria in the amateur and amateur-satellite services, and a new report on amateur service frequency allocations for lunar communications.

He recognized and thanked WP 5A Amateur Rapporteur Flavio Archangelo, PY2ZX for his excellent reports which were very well received by WP 5A.

Mr. Wrede voiced concerns regarding AST Space Mobile's us of several channels in the 70cm amateur and amateur-satellite allocations. Also, a Notice of Proposed Rulemaking by the United States Federal Communications Commission, in Docket No. 26-169 with the objective of unleashing unlicensed Spectrum for direct-to-device (D2D) communications in the 902-928 MHz, 2400-2483.5 MHz, and 5725-5850 MHz bands

4.3. Mr. Harrison presented brief oral remarks on his written report highlighting his administrative support of the officers and AC in coordination with the International Secretariat (ARRL). He reported that IARU's application and supporting documentation for ITU fee exemption, required every four years, had been submitted with expected approval during the upcoming Plenipotentiary Conference later this year in Doha, Qatar.

5. Reports from the regional organizations

5.1. Mr. Azarian presented the report from Region 1, noting that the President, Secretary, Treasurer and 3 out of 5 EC members have completed their last term and were not allowed to stand for another term in accordance with the Region 1 constitution. He welcomed Region 1 President-elect PB2T, who was elected during the Region 1 General Conference that ended the previous day.

Mr. Azarian noted that Region 1 membership continues to decline, thus affecting a review of Region 1 membership fees. He noted Region 1 continues to be a prominent voice in spectrum and regulatory matters within CEPT and by support of IARU efforts at ITU.

The updated Ethics and Operating Procedures document, prepared with volunteers from all three IARU regions, was published in June 2026. It is available to all Member Societies, together with guidance for translation into local languages.

Youth work now has a stronger institutional position in the Region. The Executive Committee decided on 19 June 2024 to change the Youth Working Group into a permanent committee, designated C8, on an interim basis. The Vienna Conference

ratified that decision and adopted corresponding provisions in the revised By-laws. Youth matters will now have the same standing in the governance of the Region as the HF, VHF+ and EMC Committees.

5.2. Mr. Molina presented oral remarks on the Region 2 written report. In an efficiency effort, the R2 EC has made some substantial changes in the way the region operates. For example, at EC meetings, one of the directors is responsible for inviting representatives from his area to attend the virtual EC meeting in order to participate more actively in the work of the region. During these meetings, the MS representatives are asked to give status reports on the amateur radio situation in their respective countries. Are the number of amateurs growing? Are there attempts to involve young amateur radio operators in the country? Is there an effort to publicize amateur radio within their country? How do they interact with their telecom authority? Also, are there ways Region 2 EC might be of assistance in any of these areas.

Mr. Molina noted the goal, of course, is to establish and maintain closer coordination and a deeper working relationship between the R2 EC and the various Member Societies within the region. This change of approach will draw a closer working relationship between our MSs and the region which will bring more participation by the MSs in the activities of the regional organization. We have only just begun this effort but so far, the R2 EC feels there is progress being made. We hope to provide further reports to the AC in subsequent meetings that this new strategy is a successful effort. We will also be including Region 2 Coordinators reports into our EC meetings in order to bring about a closer working relationship with those volunteers.

At the 2025 General Assembly, the conference adopted a proposal to set up a mechanism for terminating the membership in the region for any R2 member society that fails to abide by the obligations and duties of a member of the region. The EC was tasked with establishing the procedure for terminating a membership and adopted the procedure at the August R2 EC meeting.

5.3. Mr. Widjaja presented his written report, noting IARU R3 has 29 Member Societies and its secretariat is located at JARL headquarters in Tokyo, Japan.

The 2026 Executive Committee Meeting took place in Tokyo on 31 August 2026. IARU Region 3 EC members, IARU President Tim Ellam VE6SH attended.

An IARU Region 3 delegation attended APG27-3, held in Sapporo, Japan, from 27 to 31 July 2026. The delegation presented the IARU's preliminary positions on agenda items of concern to the amateur and amateur-satellite services.

The next meeting, APG27-4, will be held in Thailand in January 2027.

In August 2025, the IARU Region 3 Executive Committee suspended its recognition of the Bangladesh Amateur Radio League (BARL) and continued its efforts to encourage BARL to resolve its organizational and governance issues. However, no meaningful progress was achieved. At its virtual meeting in February

2026, the Executive Committee decided to recommend the termination of BARL's IARU membership and subsequently submitted this recommendation to the IARU Administrative Council.

In closing he noted IARU Region 3 remains committed to strengthening cooperation among its Member Societies and with the other IARU Regions and the International Secretariat. We will continue to support the objectives of IARU, particularly in spectrum protection, youth development, education, and the promotion of amateur radio throughout Region 3.

6. Reports from International Coordinators and Advisors

6.1 The AC received the written report for the IARU International Beacon Project (IBP) coordinator Peter Jennings, VE3SUN. The IBP team currently consists of Peter Jennings VE3SUN (IARU Liaison/Webmaster), Don Greenbaum N1DG (bookkeeping and shipping), Kevin Rowett K6TD (NCDXF) with the invaluable assistance of over a hundred volunteers who operate the beacons, contributed to the development of the new hardware, and assisted by monitoring the beacons and reporting their signals.

Currently 16 beacons are operating. The radio at OH2B is being replaced and the beacon will be on the air shortly. YV5B has been off the air for 2 years. Last year, communications with Radio Club Venezolano indicated that the station was being relocated and repaired and we expected to hear it on the air soon. Since the earthquake, this year, we have not been able to contact anyone in Venezuela for a status report. After wildfires destroyed the building and antennas at CS3B last year, a complete new set of equipment was shipped to Madeira. The beacon has been operating perfectly since it was installed. The Madeira delegation of the REP has been operating the beacon since 2017. A windstorm in June damaged the antenna It was quickly repaired, but a new antenna is needed and we will ship one from California.

6.2 The written report from IARU Satellite Advisor Hans Blondeel Timmerman, PB2T, was received.

The IARU Satellite Frequency Coordination panel is composed of Convenor: Hans Blondeel Timmerman PB2T; Region 1 representatives: Graham Shirville G3VZV, Sylvain Azarian F4GKR and Pierros Papadeas SV1QVE; Region 2 representatives: Andrew Glasbrenner KO4MA, Edson Pereira PY2SDR and Jonathan Rembla XE1BRX; Region 3 representatives: Shizuo Endo JE1MUI and Dale Hughes VK1DSH. Special advisors are Lee McLamb KT4TZ, Hans van de Groenendaal ZS6AKV, Mike Rupprecht DK3WN and Jan King VK4GEY/W3GEY. Special advisors are copied on all correspondence and provide comments when appropriate.

The IARU Satellite Frequency Coordination Panel meets once every two to three weeks in a conference call using Jitsi. From September 2025 until September 2026 a total of 49 (51 last year) coordination letters have been issued. The number of rejected coordination requests for commercial and other non-amateur missions is

stable. Still a number of commercial companies are trying to access amateur spectrum using educational institutes as their vehicle.

Mr. Blondeel Timmerman noted he is stepping down as IARU Satellite Advisor by 31 October 2026 to assume the office of Region 1 President. The AC thanked him for his several years of outstanding service as the satellite advisor..

6.3 Mr. Sach presented a very brief written report noting he had stepped down as EMC coordinator in January, recommending Mr. David Taylor, GD4FMB as a replacement. The AC approved Mr. Taylor as the new EMC Coordinator.

6.4 The written report for the IARU Intruder Watch/Monitoring Service was submitted by Gaspar Miro, EA6AAM. The IARU Intruder Watch Service (IARU IWS) currently has 29 National Coordinators, the vast majority of whom are from IARU Region 1. Of these coordinators, six regularly submit monthly reports for publication in the IARU IWS Monthly Newsletter.

During the period between the previous IARU IWS report to the AC Meeting and the present, the trend already identified in previous reports has once again been confirmed. For many years now, the majority of transmissions sent by non-amateur stations in the amateur radio bands within the HF spectrum have ceased to be predominantly transmissions from broadcasting stations. Instead, approximately 97% of these transmissions originate from radars or military stations which also make use of this part of the spectrum, in addition to their allocated frequencies, for their own communications.

These transmissions predominantly use military transmission modes and, to a lesser extent, communication modes also used by radio amateurs, such as SSB and CW.

With regard to transmissions made by radars in the amateur bands, approximately 99% are generated by military Over-the-Horizon Radars (OTHR).

In addition to this type of transmission, throughout 2026, as in previous years since 2022, a significant number of transmissions corresponding to jamming systems have been received, apparently employed as part of Electronic Warfare (EW) operations and presumably operated by military stations.

Upon receiving this type of transmission, the IARU IWS team continues to perform its functions of identifying the transmission modes and the origin of the emissions, as well as recording the corresponding reports in the IARU IWS database for subsequent publication in the IARU IWS Monthly Newsletter issued by this IARU working group.

I will be stepping down as IARU IWS Coordinator and have proposed Harald Geier, DL9NDW and Paulo Teixeira, CT2IWW as the new IWS Coordinators. Although I will be stepping down from this role, I will remain in contact with the new Coordinators in order to assist them with any questions they may have, both regarding the transmissions they receive and the various IARU IWS procedures. I will also remain available as a liaison with URE, the Spanish IARU Member Society, which

developed the IARU IWS database and currently provides its technical maintenance. I would likewise like to express my sincere appreciation to all the volunteers involved in the IARU IWS — formerly the IARU Monitoring System (IARUMS) — for their excellent work, assistance and commitment throughout all these years.

7. ITU and Related Matters

7.1 Vice President Wrede reported on WRC-27 preparations. The ITU has announced that Shanghai, China will be the location for WRC27 from October 18 to November 12, 2027. The IARU WRC27 position paper has been distributed to member societies. Currently some secondary amateur allocations are mentioned in WRC-27 Agenda Items (AI) but for now there is no direct threat identified to amateur service allocations.

The next steps in our preparations include review and update of the IARU Positioning Document during the next WP 5A meeting, focusing on AI7 and AI10, soliciting further inputs from Regions (and respective RTOs), planning of WRC-27 conference participation and IARU attendance for CPM27-2 (5-15 April 2027) and attendance at WP 5A meetings in November 2026 and May 2027

7.2 Mr. Ellam announced the ITU Plenipotentiary Conference will be held in Doha, Qatar in 2026. The “Plenipot” is the supreme organ of the ITU and is a treaty-making conference. It is composed of all 194 ITU Member states and meets every four years. The Conference determines the policies, direction and activities of the ITU, as well as electing the positions at the secretariat, namely the Secretary-General, the Deputy Secretary-General, and the Directors of the Radiocommunication, Standardization, and Development Bureau. ITU-R Director Mario Manaweicz has reached the end of the term of his office and will not be eligible for re-election.

7.3 Ole Garpestad, LA2RR submitted a written report on his work in ITU-D.

Our participation in Study Group 1 (SG1), Question 3 was chosen because it was the closest one to amateur real time disaster and relief communications. While previous ITU-D study periods have made it possible for IARU to input amateur radio emergency experience and lessons learned to other areas, the current workplan and the contributions experienced during the April meeting, with focus on resilient ICT based EmCom management, indicates a shift from our main focus.

SG1 holds two meetings each year. In each of these meetings all EmCom matters before the SG are reviewed and any appropriate actions taken.

7.4 No RTO reports were received or matters requiring attention by the AC

7.5 4U1ITU remains operational. Renovation of the building where the station is located is on hold and construction plans are being revised.

8. Strategic Planning

8.1 The AC noted that a proposal for restructuring of the IARU, as presented in past regional conferences and to the International Secretariat (IS), was no longer being proposed based on member society feedback. The AC is conducting a review of the

IARU constitution, last revised in 1989, to identify areas that require updating based on current operational practices. Mr. Stafford had been tasked to review Policy 5 regarding the IARU officer nomination process. Following discussion with the IS the following revision was proposed:

POLICY #5 (2001, revised 2003, 2012, and 2026)

concerning guidelines for the election of IARU President and Vice President

1. No later than 18 months prior to the expiration of the term of office of the President, the International Secretariat shall initiate discussions with the Administrative Council to identify suitably qualified candidates available to serve as President for the next term. At the beginning of the consultative process, the International Secretariat shall designate the individual responsible for participating in the consultative process on behalf of the International Secretariat.

2. The purpose of the consultative process shall be to identify a candidate or to assemble a list of available candidates who the International Secretariat and the Administrative Council agree are suitably qualified, do not have professional interests that conflict with the objectives of the IARU, and who, prior to taking office, will relinquish any elected position with a regional organization. The list shall be completed no later than 9 months prior to the end of the current term. The term "suitably qualified" shall be construed to mean an individual who possesses the necessary skills, background and experience to effectively carry out the duties of the President of IARU. The International Secretariat shall engage in the consultative process with the IARU Administrative Council including the Presidents and Secretaries of the three IARU Regional Organizations and any IARU officers who are not potential candidates for the office of President or Vice President. The consultative process meetings may be in-person or virtual.

3. The IARU Secretary shall distribute an IARU *Calendar* no later than 16 months prior to the expiration of the term of office of President, advising the member-societies that the consultative process has been initiated and inviting member-societies to propose to their Regional Organization the names of individuals who are suitably qualified to serve as President. The Calendar shall notify the member societies that any proposal shall be received by their Regional Organization no later than 14 months prior to the expiration of the current officer terms. Any such proposals shall include information demonstrating the individual is suitably qualified to serve as an IARU officer. The Regional Organization shall forthwith forward to the International Secretariat all of the proposed individuals from their respective region along any appropriate supporting material and any comments regarding the qualifications of such individuals that the Region deems appropriate. The current President shall be included among the list of individuals unless the President has notified the Administrative Council that he or she is not standing for reelection.

4. If a member of the Administrative Council is the subject of such discussion, he or she may be asked to withdraw from that portion of any meeting during the consultative period dealing with the selection of candidates for the office of President.

5. If the International Secretariat receives any proposed individuals directly, either from an individual or from a Member Society, it shall immediately notify the appropriate Regional Organization wherein such potential candidate resides that the International Secretariat has received the nomination. The International Secretariat shall immediately consult with the appropriate Regional Organization as to that person's qualifications to serve as an IARU officer.

6. No later than 9 months prior to the expiration of the current officer terms following the completion of the list and after due consideration of the discussions with the Administrative

Council as set out above, the International Secretariat shall select its nominee from the list of candidates and shall advise the Administrative Council of its selection together with supporting material. The selection of the nominee by the International Secretariat shall thereafter be ratified by the vote of the Member Societies. If, in the opinion of the International Secretariat, it appears that there are two, or more, equally suitably qualified candidates, then those candidates may be put forward for election by the Member Societies.

7. The International Secretariat shall be invited to a meeting of the Administrative Council to present its nomination(s), or the nominations may be made at a virtual meeting of the Administrative Council.

8. The same procedure shall be used in the case of the selection of a nominee, or nominees, for the office of Vice President.

Following discussion, the AC unanimously approved the revision to Policy 5.

9. Operational and Administrative Matters

9.1 Mr. Harrison reported no new member society applications have been received and no member society or second society issues have been reported

9.2 The AC is in receipt of a proposal from the IARU Region 3 Executive Committee to terminate the member society status of the Bangladesh Amateur Radio League (BARL).

As background, IARU Region 3 formally notified BARL on August 29, 2025 that BARL's membership had been suspended pending further developments and provided the organization with three months to resolve the matter. Unfortunately, no such resolution was reached, and the issues concerning BARL's qualification for IARU membership remained unresolved. The Region 3 Executive Committee determined that BARL no longer satisfied the qualifying condition of a Member Society, namely the existence of a functioning national representative organization. Accordingly, Region 3 withdrew regional recognition and determined that, as a matter of fact,

Bangladesh is presently without an effective member society representation through BARL.

On February 26, 2026, President Ellam received a letter from Region 3 President Widjaja, on behalf of the Region 3 Executive Committee, requesting the AC begin the formal process of removing BARL as an MS.

On July 30, 2026, Secretary Harrison sent, in accordance with By-law 11, a letter to BARL President S21DC advising him that the AC is addressing this matter and provided 14 days for a response. If a response is not received then the AC would consider the proposal from the R3 EC to terminate BARL as a member society. An acceptable response was not received from BARL thus, in accordance with By-law 12, the AC unanimously approved and instructed the Secretary to issue an IARU Calendar and ballot to all member societies on the question of whether to terminate the MS status of BARL

9.3 Mr. Harrison reported no other member society or second society issues had been reported.

9.4 Mr. Harrison presented the 2027 IS budget for review. No action was required by the AC

9.5 The IARU officers had previously received a complaint regarding contest style operation occurring on the 30-, 17-, and 12-meter bands. Mr. Wrede conducted a review of IARU Resolution 17-1 and presented a proposed draft to the AC. Following discussion, the following revision was adopted:

RESOLUTION 17-1
As amended at Vienna 2026

Concerning the use of secondary and narrow allocations below 25 MHz. The IARU Administrative Council, Landshut, 2017, recognizing that the amateur service allocations at 135.7-137.8 kHz, 472-479 kHz, 5,351.5-5,366.5 kHz, and 10.1-10.15 MHz are on a secondary basis with other services having priority, and further recognizing that the allocations at 18.068-18.168 MHz and 24.890-24.990 MHz are also relatively narrow, and acknowledging that these bands therefore are unable to support coordinated, competitive activities without excessive disruption to primary users and other legitimate pursuits, expresses appreciation to the sponsors of competitive activities who universally avoid utilizing these bands, resolves that it is IARU policy that coordinated, competitive activities not be permitted in these bands, and strongly encourages all radio amateurs to observe the respective regional band plans for these and all other amateur allocations.

9.6 Commonwealth Telecommunications Organization (CTO) is one of the oldest/largest Commonwealth intergovernmental information and communications technology bodies and has influence at the ITU and RTOs. CTO approached President Tim Ellam regarding a partnership to introduce amateur radio programs in isolated, underserved schools, primarily in Africa. IARU can provide support via its member societies and

has interest in assisting CTO. The AC has asked Remy Denker, PA0AGF, to lead a CTO initiative.

9.7 The status of the IARU Amateur Radio Administration Course was reviewed. The AC recognizes the importance of this course and supports its continuation; however, the course material is over 10 years old and needs to be updated. A working group of Messrs. Ellam, Molina, Yamamoto, and Blondeel Timmerman will review the material and determine required revisions.

9.8 The IARU Technical Representative appointments were reviewed. The AC noted with great appreciation the work of our volunteer technical representatives.

9.9 The AC reviewed nominations for the IARU Diamond Award. Following review, the AC unanimously bestowed the IARU Diamond Award to Graham Shirville G3VZV.

Mr. Shirville has been involved in IARU satellite coordination at least since 2002. He maintains an outside facing website, showing status and results of frequency coordination requests. He is involved in many satellite activities, especially those related to the introduction of novel technologies, including wideband and microwave experiments. His involvement in prototyping low-cost solutions led to the growing popularity of amateur satellite communications. As an advisor to organizations outside IARU, he demonstrated the leading role of radio amateurs in pioneering innovative technical solutions.

10. Mr. Azarian presented an update on the hamradio.org website. In 2021, then IARU Secretary Dave Sumner, K1ZZ, received a communication from the owner of the internet domain hamradio.org suggesting the IARU might take responsibility for it as a further way of reaching out to the broader community. IARU accepted the offer as a way to interest and motivate persons for amateur radio by developing a new website directed to this URL. The idea is to make it easier to find relevant information and how to move on to national societies for those interested. Some member societies already have good initial information on their websites, but others have not. This new website is intended to complement what already is available by some member societies.

Region 1 has taken the development lead and is continuing its development work on the domain website.

11. The AC approved “Amateur Radio: Connecting Generations, Inspiring the Future” as the theme for World Amateur Radio Day 2027

12. The IARU Travel Policy was reviewed and no action taken.

13. The AC reviewed a proposal to recognize Morse Code as an Intangible Heritage. Region 1 has adopted an initiative to have the subject on the agenda for a forthcoming UNESCO meeting. The AC approved the initiative and IARU will request a letter of support from the ITU Secretary-General.

14. The next meeting of the AC will be scheduled for early December, virtually, with the next in-person meeting planned prior to the Region 3 General Conference tentatively scheduled for the third week of November, 2027 on Bali, Indonesia.

There being no further business, Mr. Ellam thanked everyone for their participation and adjourned the meeting at 14:50 Vienna local time.

Respectfully Submitted,

Joel Harrison, W5ZN
Secretary
